

ECR ELEVATOR INTERIORS

PRODUCT CATALOG

ECR Elevator Cab Renovations Inc., founded in 1987 in Ottawa, Ontario, began by designing, manufacturing, and installing custom cab interiors for local companies. Over time, ECR expanded its reach to clients across Canada and the U.S.

In 2003, to meet growing North American demand, ECR introduced the patented A-Look Panel Fitment System, an easy-to-install cab interior using an aluminum extrusion system that locks panels together securely.

In 2015, ECR launched the patent-pending C-Look Panel Fitment System, featuring reversible panels for double the lifespan.

ECR manufactures all components in-house to ensure top quality, with state-of-the-art production facilities and strict project management protocols.

In 2019, ECR partnered with MAD Elevator Inc., Canada’s largest elevator fixture manufacturer, to offer comprehensive elevator interior and fixture solutions.

In 2023, MAD and ECR developed the award-winning Fast 1 cab shell system, marking the beginning of a new era in modern, fast-assembly shell designs.

-  ECR's customizable cab layouts are ASME 17.1/CSA B44 code compliant.
-  All of our standard substrates are LEED certified, FSC and NAUF compliant.
-  All ECR A-Look & C-Look layouts feature reversible laminate and metal panels
More info on Page 40.
-  All ECR modernization projects require no gluing, no trimming and maximum of 3 measurements, making them quick and easy to install.

FAST 1 CAB SHELL

The Fast 1 Cab Shell is an innovative solution designed for swift installation, making it perfect for time-sensitive projects. Crafted from durable materials, it provides a versatile foundation that accommodates a wide range of design preferences and is suitable for both contemporary and classic interiors. Its ease of installation and maintenance, combined with the ability to customize finishes and accessories, offers contractors a cost-effective, high-quality option for rapid elevator upgrades or new installations, ensuring client satisfaction with minimal downtime.

FAST 1
— CAB SHELL —

FAST 1 OVERVIEW

- Install the shell without having to leave the platform or canopy. Greatly improves speed and safety.
- **Quick Connect System:** Install non-access walls, fronts, and canopies without bolts, automatic panel alignment. Pins & slots instead of bolts.
- Cage nuts used at all fastening points for **one-handed fastening**.
- With greater than **75% fewer bolts** than traditional designs, installation speed is optimized.
- Car top railings are designed as an integral part of the shell. **Reduce labor by 8 hours** or more.
- Panels numbered for **easy identification and assembly**.
- Only nut driver, screwdriver and square required to install.
- Option for **fully integrated car top rail kit**.
- Option for sound dampening.
- **Reversible canopy** which allows the reinforcing ribs to be up or down.
- Universal car top ducting. Customizable on site. Does not require mechanical fastening.
- All cabs come with **pre-fitted car top kick plates**.

QUICK CONNECT SYSTEM

FAST FEATURES

- ① **FAST PRICING**
Get a Cab Shell quote in 24 hours.
 - ② **FAST ENGINEERING**
Get drawings and production files in 24 hours.*
 - ③ **FAST MANUFACTURING**
Your shell will ship out in four weeks of drawing approvals.*
 - ④ **FAST INSTALL**
Unpack and easily install the Cab Shell in less than four hours.
- ⚡ All Fast 1 Cab Shells are quick to quote and manufacture and reduce labor by 8 hours or more.

**For standard jobs*

A-LOOK SYSTEM

The **A-Look System** epitomizes advanced elevator cab design, offering building contractors a blend of structural durability and aesthetic flexibility. It features high-grade stainless steel anodized aluminum extrusions for a robust framework, accommodating a wide range of finishes including wood veneers, laminates, and metals. This system is engineered for easy panel replacement, ensuring cost-effective maintenance and minimal downtime. Its modular design and contemporary aesthetic make it an ideal choice for any architectural project, meeting the demands of style and functionality with unparalleled efficiency.

A-LOOK FEATURES

- ① **Removable Hidden Pad Hooks**
Available on most models.
- ② **Patented SS#4 Anodized Aluminum A-Look Interlock Extrusion**
Protects the panel edges and offers the convenience of reversible horizontal laminates.
- ③ **SS#4 Anodized Aluminum Panel Edge Extrusion**
Protects the panel edges better than just paint!
- ④ **Handrails**
Bolted securely through the cab shell and removable from inside the cab interior.
- ⑤ **Removable Stainless Steel Kick Plate**
Removable without needing to remove the wall panels for floor work.
- ⑥ **Layout Weight Options**
Available in Regular, Light, and Ultra Light weight classes.

DUNDAS

The Dundas model offers wide reversible laminate panels available in quick turnaround options, with our patented A-Look™ protective extrusion.

Interior Shown with:

2" SS#4 flat handrail, Bristol SS#4 Convertible Ceiling, Light Maple laminate

DUNDAS XR

The Dundas XR model offers a split laminate interior look with a laminate finish paired with robust metal below the handrail for added durability. The reversible laminate panels are available for quick turnaround.

Interior Shown with:

2" SS#4 flat handrail, Big White fluted polycarbonate Ceiling, Bungalow Brown laminate with SS#4 on bottom 2 panel rows

DUNDAS AL

The Dundas AL model adds accent lines and back painted safety glass.

Interior Shown with:

½" SS#4 tubular handrail, Blue Mountain SS#4 convertible ceiling, Light Maple laminate with center back-painted safety glass

ASHBURY

The Ashbury is the most popular A-Look model. When created, its horizontal panel design was as unique as the famous community it was named for, making it a fine update to any elevator interior! All panels are reversible except for Back Painted safety glass.

Interior Shown with:

2" SS#4 flat handrail, SS#4 Bristol convertible ceiling, Slate laminate with back-painted safety glass.

ASHBURY AL

The Ashbury AL adds vertical accent lines in keeping with the design spirit of the famous "Painted Lady" Victorian houses found in San Francisco.

Interior Shown with:

3" SS#4 flat handrail, Washington SS#4 ceiling, Bungalow Brown laminate with back-painted safety glass

NOTTING HILL

The tall vertical lines of the Notting Hill design brings to mind long rows of buildings joined side by side as is typical in old London neighborhoods.

Interior Shown with:

2" SS#4 flat handrail, Bristol SS#4 Convertible ceiling, Dark Walnut laminate with mirror.

NOTTING HILL AL

The tall vertical lines of the Notting Hill design brings to mind long rows of buildings joined side by side as is typical in old London neighborhoods. This layout features a reversible bottom panel.

Interior Shown with:

2" SS#4 flat handrail, Massif SS#4 ceiling, Sienna laminate

AVANT GARDE

This unconventional asymmetric design is a perfect fit for those looking for a bold and progressive look exemplified by the Avant-Garde arts movement.

Interior Shown with:

2" gold brushed SS# flat handrail, Whistler gold brushed SS#4 ceiling, Honeywood laminate

VICTORIA PARK

In this model, the combination of vertical mirrors or glass and horizontal panels respects the architectural traditions of Victorian era structures.

Interior Shown with:

1 1/2" SS#4 tubular handrail, Blue Mountain SS#4 convertible ceiling, Linen SS#4 material with back-painted safety glass.

TIMES SQUARE

The large safety glass design resembles the bright lights and screens of this famous tourist attraction.

Interior Shown with:

2" SS#4 flat handrail, Washington SS#4 ceiling, Camel laminate and center Back-Painted safety glass.

RIVER WALK

The River Walk shows the ability to combine multiple back painted glass panels with stainless steel. The design's green & blue represent the two great rivers while the taupe represents the shoreline that joins them.

Interior Shown with:

2" Gold brushed SS#4 flat handrail, Vail gold brushed SS#4 vaulted ceiling, gold brushed textured SS with mosaic graphic glass.

FITZROY

The Fitzroy is a classic design which shows a more formal combination of glass, veneer or plastic laminate and metals fitting for the traditional buildings of Fitzroy Square.

Interior Shown with:

3" SS#4 flat handrail, Castle SS#4 ceiling, Royal Oak laminate with mirror.

A-LOOK INSTALLATION

AVALON

The refined mill work and veneers found in the Avalon invokes an image of the medieval architecture one might have found in the Glastonbury Abbey in King Arthur's time.

Interior Shown with:

1 ½" SS#4 tubular handrail, Lake Louise SS#4 Ceiling, Mill work & veneers with center mirror

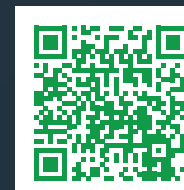

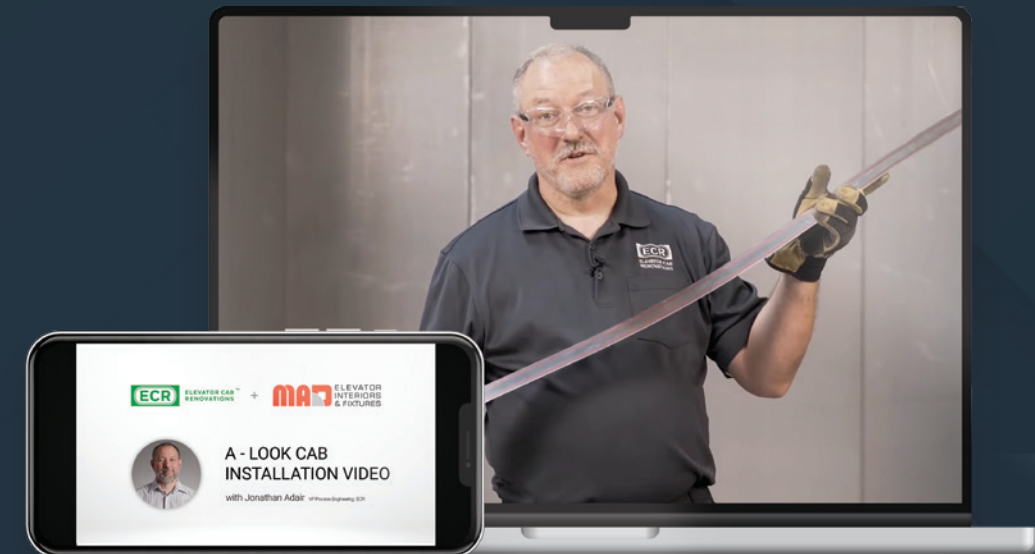

ST. MARKS SQUARE

The grand paneling with back painted safety glass design captures the beauty and importance of the Piazza San Marco.

Interior Shown with:

1 ½" SS#4 tubular handrail, Vail SS#4 vaulted ceiling, Bridgewood Laminate with back-painted safety glass.

Watch as our expert shows step by step instructions on how easy it is to install our A-Look cab interiors.

B-LOOK SYSTEM

The **B-Look System** combines elegance and resilience, featuring sophisticated stainless steel or bronze trims. It accommodates a variety of finishes like wood, laminate, and metal, suitable for any design style. With its durable construction and easy-to-update panels, this system offers a practical yet stylish solution for elevator interiors, aligning with the latest architectural demands and ensuring straightforward maintenance for building contractors.

B-LOOK FEATURES

- 1 Removable Hidden Pad Hooks**
Available on most models.
- 2 Flexible Reveals run under the panels by 1"**
Hang-on panels trimmed in SS#4 anodized aluminum C Trim.
- 3 Handrails**
Bolted securely through the cab shell and removable from inside the cab interior.
- 4 Binding Options**
Four different binding options to choose from.
- 5 Removable Stainless Steel Kick Plate**
Removable without needing to remove wall panels for floor work.
- 6 Layout Weight Options**
Available in Regular, Light, and Ultra Light weight classes.

CELEBRATION SQUARE

The Celebration Square model features full height vertical laminate panels that mimics the beauty and happiness, that Celebration Square offers to its community.

Interior Shown with:

2" SS#4 flat handrail, SS#4 Aspen ceiling, Black PVC edge, Toasted Sand laminate.

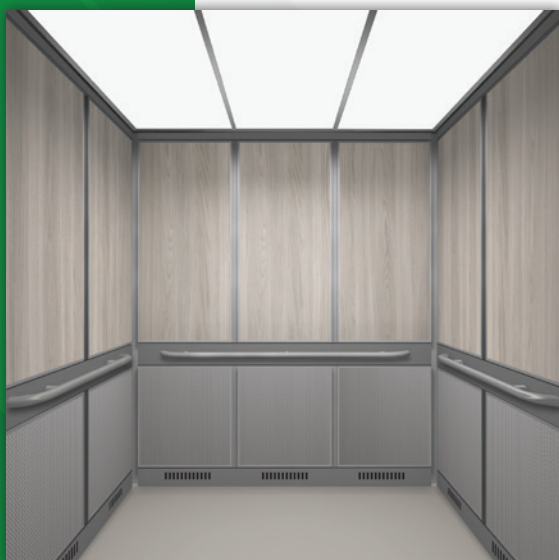

TRANQUILITY PARK

Tranquility Park was named to celebrate the Apollo 11 moon landing in 1969. The Tranquility Park model with plastic laminate above and below the handrails reflects the no nonsense "can do" NASA attitude it took to accomplish this outstanding mission.

Interior Shown with:

2" SS#4 flat handrail, Bristol SS#4 Convertible ceiling, Stainless Anodized Aluminum J Trim, Sienna laminate

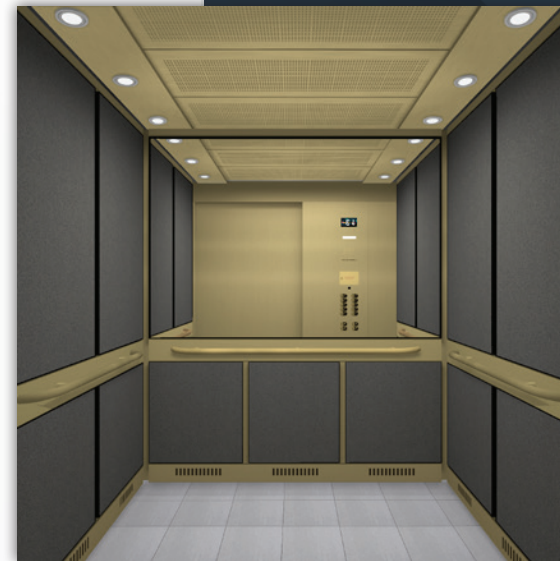

TRANQUILITY PARK XR

The Tranquility Park XR model showcases plastic laminate panels with a metal material below the handrails to add to its durability.

Interior Shown with:

2" SS#4 flat handrail, Big White fluted polycarbonate ceiling, Light Maple laminate

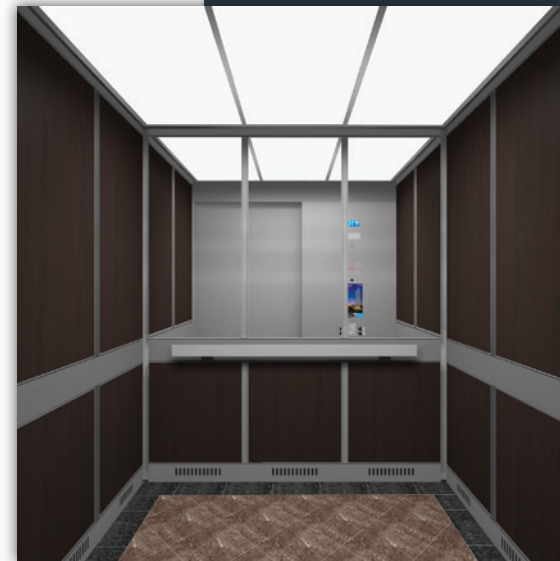

MAPLE LEAF SQUARE

Inspired by the vibrant heart of Toronto, the Maple Leaf Square Elevator Cab Interior features a spacious layout with a large mirror back wall, enhancing the sense of space and elegance.

Interior Shown with:

1 1/2" Gold brushed SS#4 tubular handrail, Blue Mountain gold brushed SS#4 convertible ceiling, Gold brushed stainless anodized aluminum L Trim, Ash brown laminate with large mirror.

FRANKLIN SQUARE

With long lines and mirror, this model has a sense of open space that was intended by William Penn the Square's designer. Franklin Square is the site where Benjamin Franklin conducted his kite and key experiment.

Interior Shown with:

3" SS#4 flat handrail, Big White fluted polycarbonate Ceiling, Stainless Anodized Aluminum J Trim, Royal Oak laminate with mirrors

HARVARD SQUARE

With decorative stainless below the handrail and laminate above, the Harvard Square has an air of sophistication garnered by Harvard University while providing for the durability needed in any leaning institution.

Interior Shown with:

2" SS#4 flat handrail, Blue Mountain SS#4 convertible ceiling, Stainless Anodized Aluminum J Trim, Light Maple with SS#4 below handrail

TRINITY SQUARE

Inspired by the historic charm of Toronto's Trinity Square, this elevator cab interior features a spacious layout with multiple mirror panels, including a large mirror back wall that enhances the sense of openness and elegance.

Interior Shown with:

1 1/2" Gold brushed SS#4 tubular handrail, Massif gold brushed SS#4 ceiling, Savannah Cherry laminate

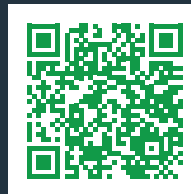

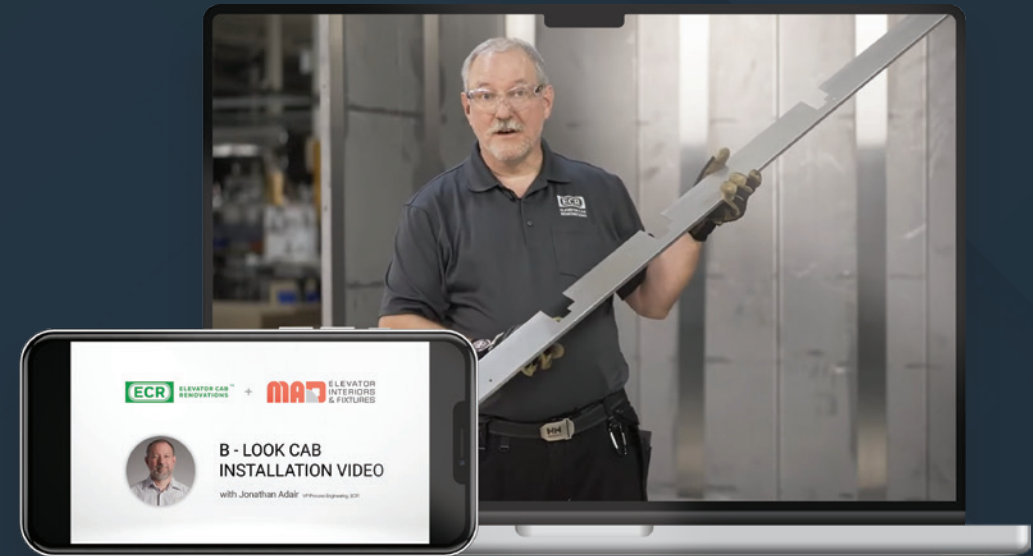

EMPIRE STATE PLAZA

Much like the Square it is named after, this cab is made to impress! Stainless steel below the handrail and mirror above on the rear wall serve to accomplish this goal. Nelson Rockefeller would have approved!

Interior Shown with:

2" SS#4 flat handrail, Castle SS#4 Ceiling, Textured SS with SS#4 below handrail

B-LOOK INSTALLATION

Scan the QR Code to watch our installation video.

Watch as our expert shows step by step instructions on how easy it is to install our B-Look Cab interiors

C-LOOK SYSTEM

The **C-Look System** elevates elevator interiors with its unique blend of materials, including glass, stone, metals, wood veneers, and laminates. Designed for versatility, it suits various architectural styles, offering customizable design options. This system is not only aesthetically appealing but also durable and easy to maintain, featuring panels that are simple to replace. Ideal for contractors seeking sophisticated and practical elevator cab solutions, the C-Look System enhances the value and appeal of any building, ensuring a premium passenger experience with minimal upkeep.

C-LOOK FEATURES

- ① **Removable Hidden Pad Hooks**
Available on most models.
- ② **Patented C-Look Extrusion**
Protects the panel edges. Black glass reinforced Fluted Polycarbonate inlay.
- ③ **Handrails**
Bolted securely through the cab shell and removable from inside the cab interior.
- ④ **Removable Stainless Steel Kick Plate**
Removable without needing to remove the wall panels for floor work.
- ⑤ **Layout Weight Options**
Available in Regular, Light, and Ultra Light weight classes.

ROCKEFELLER

The Rockefeller model with full height plastic laminate reflects the beauty of the skyscrapers in Midtown Manhattan.

Interior Shown with:

1 1/2" gold brushed SS#4 tubular handrail, Lake Louise gold brushed SS#4 ceiling, gold brushed SS#4 material

ST. LOUIS SQUARE

Like Saint Louis Square, the closest thing to a European neighborhood square you'll find this side of the Atlantic, this model adds a classic look to any cab with wall panels separated by a 6" handrail panel.

Interior Shown with:

2" SS#4 flat handrail, Washington SS#4 ceiling, Bungalow Brown laminate with SS#4 below handrail

PLAZA DEL CAMPO

The Piazza Del Campo is one of Europe's great squares. Like all C-Looks, this model uses wide lines to divide the panels like the 8 lines of travertine separating the 9 sections red brick in this inspiring square.

Interior Shown with:

2" SS#4 flat handrail, Massif SS#4 ceiling, Bridgewood laminate with Ultra White safety glass and SS#4 below handrail

PLAZA MAYOR

The Plaza Mayor's rectangular design highlights uniformity in architecture. Like its namesake, it features metal and laminate in rhythmic patterns respecting this architectural beauty in the very center of Spain.

Interior Shown with:

1 1/2" gold brushed SS#4 tubular handrail & bumper rail, Blue Mountain gold brushed SS#4 convertible ceiling, Slate laminate with gold brushed SS#4 below handrail

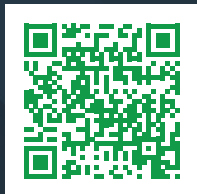

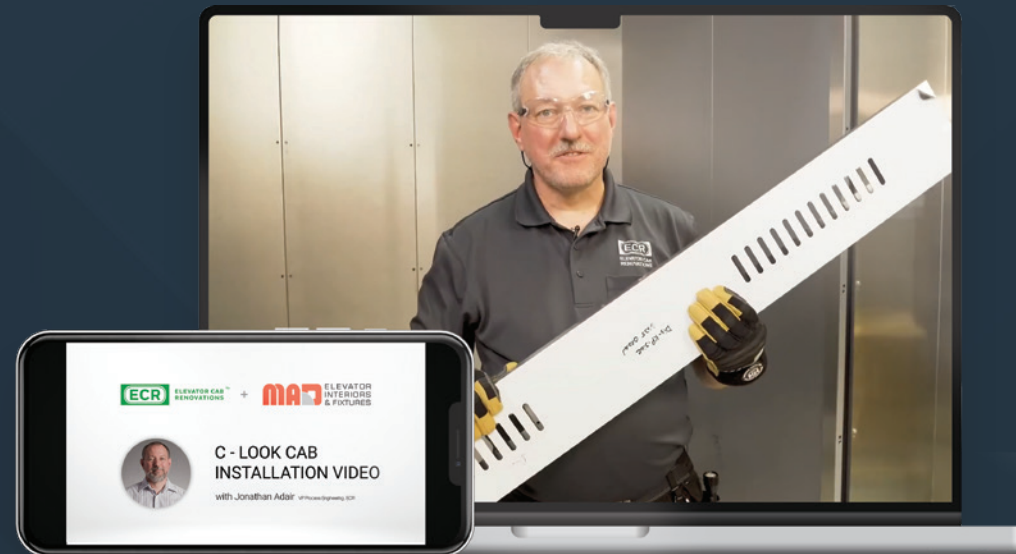

FEDERATION SQUARE

By using a variety of materials such as glass, laminate and stainless steel in a vertical design – like its namesake – the Federation Square blends new and old world themes into an innovative design.

Interior Shown with:

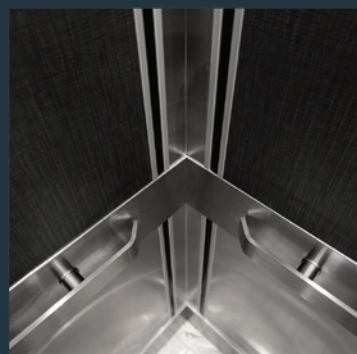

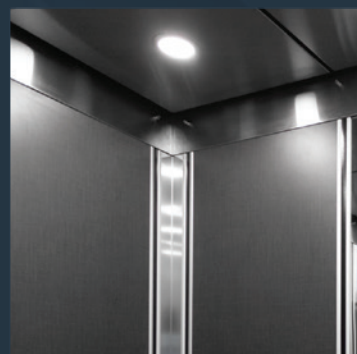

3" SS#4 flat handrail, Massif SS#4 ceiling, Light Maple and grey mirror with SS#4 below handrail

C-LOOK INSTALLATION

Scan the QR Code to watch our installation video.

Watch as our expert shows step by step instructions on how easy it is to install our B-Look Cab interiors

MATISSE PANORAMA

Now changing your cab interior requires only your imagination. The High-Definition MatissePanorama, composed of multiple screens in various sizes and orientations, is installed inside your elevator and interfaced with the controller.

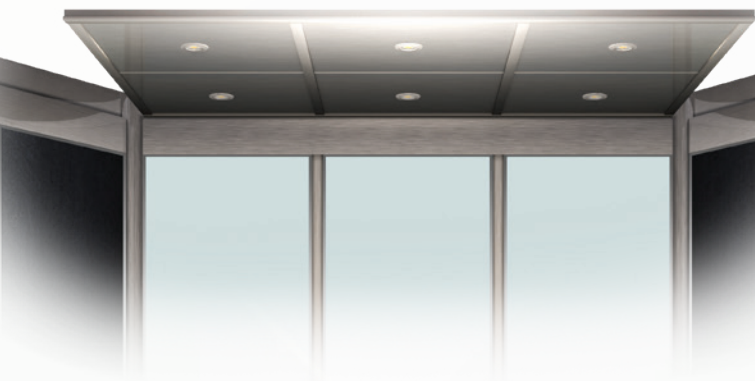

This allows full interaction between the display with real-time position and travel of the elevator. The end result, a fully immersive experience, built around the passenger.

Use the MosaicONE Digital Signage software to create and schedule content providing a distinctive experience that will have a high impact on the passenger and enhance the usability of your elevator.

- RSS feed capability for weather, news stocks, and Traffic updates.
- Full, commercial HD screens.
- Proprietary interface between the elevator and controller allowing for emergency messages, images, notices and floor information.
- Multiple arrangements with single, double or three screens on one or multiple walls.

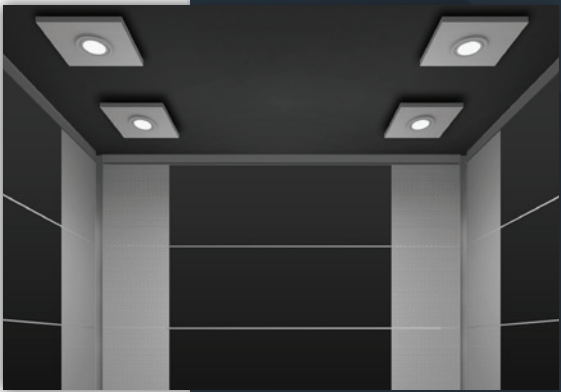

CEILING SYSTEMS

Our ceilings are known for their robust all-metal construction and high-precision manufacturing, ensuring both aesthetic appeal and strict compliance with safety and environmental standards. With a range of styles each type offers customizable features to fit specific design needs. These ceiling systems blend functionality with design, meeting various certifications to ensure sustainability and safety.

- 1 All Metal Construction**
No wood substrates.
- 2 High Precision**
Computer controlled manufacturing
- 3 Highly Customizable**
Customize to your unique canopy layout.

-  ECR's ceilings prove there is no compromise between aesthetics and code compliance (ASME 17.1/CSA B44)
-  All of our standard substrates are LEED (Leadership in Energy and Environmental Design) certified, FSC (Forest Stewardship Council) and NAUF (No Added Urea Formaldehyde) compliant.
-  Lightweight ceiling options available. See marked images for more information.

ASPEN

The Aspen is a single light fixture Slim-Line Accent. It can be arranged in a variety of locations and number of units to accommodate almost any canopy configuration. It features a drop from the canopy of only 2", grasp proof edges and illumination provided by 4" LED disk lights.

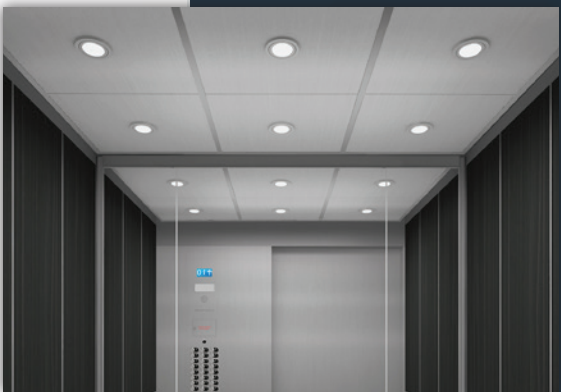

Weight for a 2,500 lb car: **12 lbs**

ALPINE

The Alpine is a double light fixture Slim-Line Accent. It can be arranged in a variety of locations and number of units to accommodate almost any canopy configuration. It features a drop from the canopy of only 2", grasp proof edges and illumination provided by 4" LED disk lights.

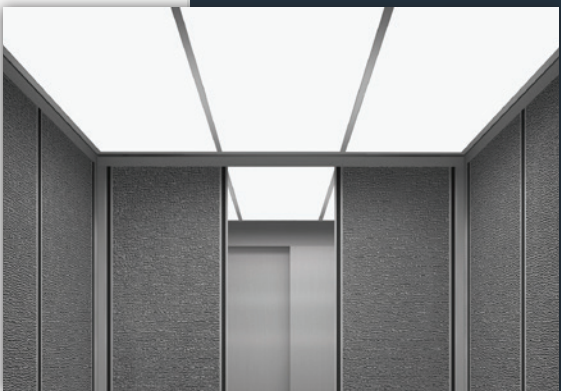

Weight for a 2,500 lb car: **18 lbs**

MASSIF

The Massif is a light weight framed ceiling. It can be designed with a variety of interior frames to accommodate any hatch location. Its panels can be made from a variety of decorative metals with interesting custom cut-outs.

Weight for a 2,500 lb car: **59 lbs**

BIG WHITE

The Big White is a light weight framed ceiling with Fluted Polycarbonate panels. Lit with LED strip lights, it is excellent for use in environments where plenty of diffused light is required.

Weight for a 2,500 lb car: **34 lbs**

WHISTLER

The Whistler is an aluminum cored floating ceiling with LED pot lights. The metal cladding can be butt jointed or have a black painted reveal.

Weight for a 2,500 lb car: **116 lbs**

WASHINGTON

The Washington is an aluminum cored floating ceiling with LED pot lights. It features raised panels made of decorative metal instead of flat cladding. This added feature provides a feeling of depth.

Weight for a 2,500 lb car: **121 lbs**

CASTLE

The Castle is an offset floating ceiling with a square center section that is 2" higher than the base. The ceiling is clad in SS#4 and features four LED disk lights and an LED ribbon light inside the offset. This gives the cavity a warm glow.

Weight for a 2,500 lb car: **130 lbs**

LAKE LOUISE

The Lake Louise is an offset floating ceiling with an oval center section that is 2" higher than the base. The ceiling is clad in SS#4 and features four LED disk lights and an LED ribbon light inside the offset. This gives the cavity a warm glow.

Weight for a 2,500 lb car: **130 lbs**

BRISTOL

This convertible ceiling allows quick access to top hats or even just canopy space. Side mounted from inside the cab, the self aligning Bristol brackets reduce installation time to 1 hr. The Bristol is lit with 4 LED disk lights.

Weight for a 2,500 lb car: **72 lbs**

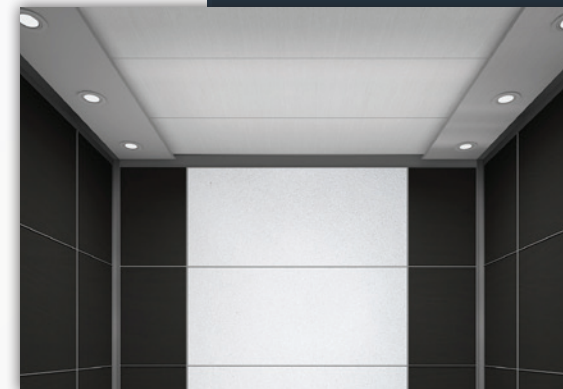

BLUE MOUNTAIN

This convertible ceiling allows quick access to top hats or even just canopy space. Side mounted from inside the cab, the self aligning troughs reduce installation time to 1 hr. The Blue Mountain is lit with 6 LED disk lights.

Weight for a 2,500 lb car: **82 lbs**

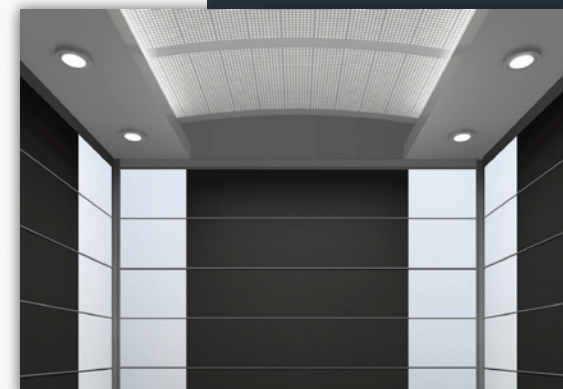

NORTHSTAR

This convertible ceiling allows quick access to top hats or even just canopy space. Side mounted from inside the cab, the self aligning troughs reduce installation time to 1 hr. The NORTHSTAR is lit with 6 LED disk lights.

Weight for a 2,500 lb car: **88 lbs**

VAIL

The Vail is a barrel vaulted ceiling with its apex near the canopy. Its design imparts a feeling of height and openness. It is made with SS#4 and is lit with four LED down lights and LED strip "Up" lighting located in the troughs.

Weight for a 2,500 lb car: **151 lbs**

BINDING TYPES

The range of elevator interior bindings includes A-Look and C-Look extrusions for edge protection, available in stainless steel or clear anodized aluminum, as well as B-Look J and L binders for a polished look. These bindings enhance the aesthetic appeal and structural integrity of the elevator panels.

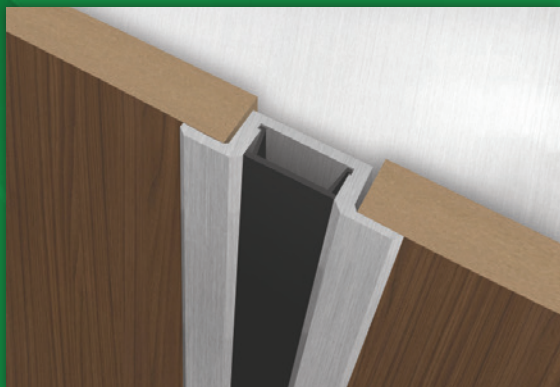

A-LOOK BINDER

Patented A-Look Extrusion protects panel edges.
SS#4 anodized Aluminum

B-LOOK SELF EDGE

Self edged

C-LOOK BINDER

C-Look Extrusion protects panel edges.
Clear anodized aluminum with polycarbonate inlay.

B-LOOK J BINDER

"J" Binders. SS#4 anodized aluminum wraps around with mitered corners.

B-LOOK BLACK PVC EDGE

Self edged black PVC edging

B-LOOK L BINDER

"L" Binders. 1/8" thick SS#4 anodized aluminum wrap around with mitered corners.

HANDRAILS & BUMPERS

A wide variety of handrail and bumper rails that each add unique dimensions and weights, catering to different design needs and compliance requirements. Additional sizes and finishes available. Please contact us for more information.

1 1/2" ROUND HANDRAIL

1 1/2" diameter round handrail.
Available straight or curved.

REVERSIBLE PANELS

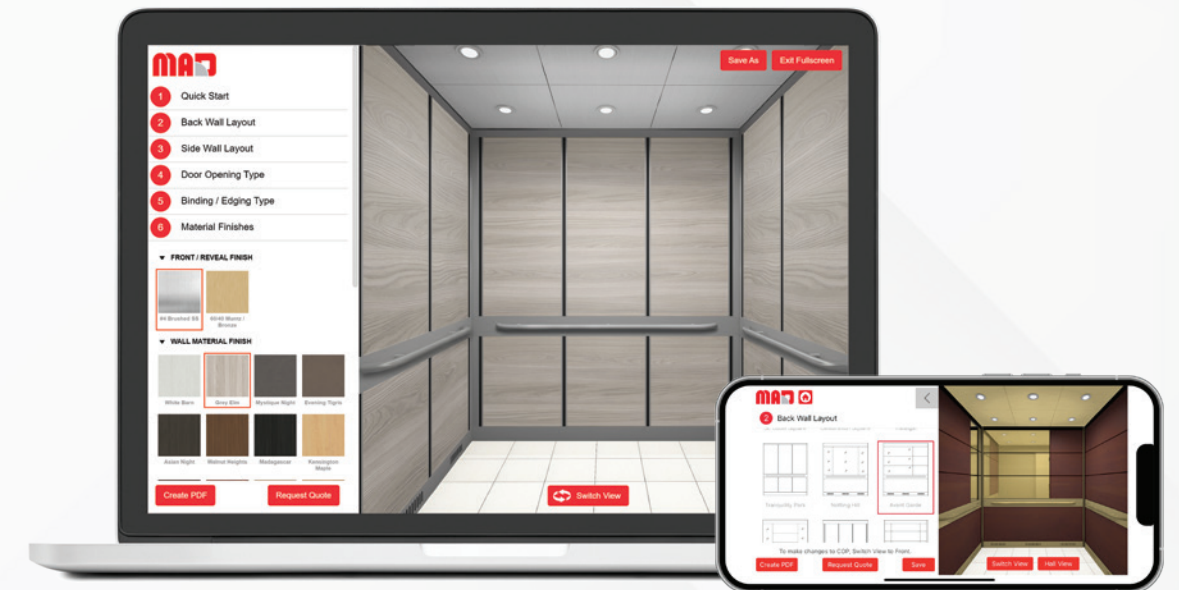

Our A-Look and C-Look reversible panels provide long lasting benefits to customers. If your panel becomes damaged you can simply remove and flip the panel reducing any worry in the event that a manufacturer stops producing that specific laminate. Providing you with twice the life for one price.

Scan here to watch our videos, view step-by-step instructions and see how easy it is to flip our reversible panels.

PRODUCT CONFIGURATOR

Design a Cab & COP from anywhere with an Internet connection!

Using our app (iOS/Android), a computer or tablet browser, the user can interactively make selections and work with their client to finalize their cab project concept.

- Mix and match perfect combinations down to the individual panel.
- Thousands of possible designs.
- Preview and export a PDF of your design for your records and for approval from customers.
- Save your configurations to your online account.
- Request a quote directly from the MAD Configurator.
- Reduce approval time and drawing revisions by using the MAD Configurator before ordering.
- Configure COP and hall fixtures to compliment your interior.

Scan here download our configurator app on iOS and Android or visit config.madelevator.com to start designing your elevator today.
